Fix ordering of guard clauses so that they are all reachable, moved the test case for both vector

47.37% of code coverage compared to my 15% estimated
Test case for having the second vector as all 0s

36.84 of code coverage compared to my 15% estimated
Test case for the first vector as all 0s

21.05% of code coverage compared to my 11% estimated
Test case for the second vector empty

15.79% of code coverage compared to my 15% estimated
Test case for the first vector empty

26.32% of code coverage compared to my 11% estimated
Test case for vectors of different sizes

73.68% of code coverage compared to my 23% estimated
Test case for vector multiplication together
